

Moisture Monitor

DISPLAY FEATURES

- ◆ Exclusive FG Moisture Sensor
- ◆ Easy to install
- ◆ Simple to calibrate
- ◆ Live readings all the time!
- ◆ Direct moisture readout for up to 6 different crops

The Loup Electronics FG Moisture Sensor can be mounted directly to the bottom of a "bubble up" auger or on the clean grain access door on any combine. The sensor has a ceramic cover over the sensing element for long-term operation in this high wear area of the combine.

Unlike the Elevator side mount where the readings from the crop harvested may be delayed by seconds or even minutes,

the Loup Electronics FG Sensor will give instantaneous readings all the time.
